UNIQUE FEATURES

- Front and rear sliding toughend glass doors. All doors have long vertical aluminium handles and rubber seals (doors can be replaced with solid glass if required).
- All MR series pie warmers are supplied with 5 wire rack trays and a humidifier tray
- The temperature is controlled with an adjustable thermostat so that the temperature can be set to your requirements
- MR series units are powder coated black as standard, custom colours can be made to order.

NS4 and NQ4

- The NS4 & NQ4 are manufactured from hygienic and attractive stainless steel.
- Two front and two rear doors as standard. All 4 sliding doors are made from toughened glass. (optional solid rear stainless panel also available)
- The temperature is controlled with an adjustable thermostat so that the temperature can be set to your requirements
- Both are fitted with a front mounted temperature indicator and supplied with 4 wire racks and a humidifier tray
